Welcome to PRS KOREA 2026

"A 60-Year Legacy, Shaping the Future"

The 84th Annual Congress of the Korean Society of Plastic and Reconstructive Surgeons (KSPRS). This year's international conference will be held in person from November 8th (Sunday) to 10th (Tuesday), 2026, at the Grand Intercontinental Seoul Parnas in Seoul, Korea.

The theme for this year, "A 60-Year Legacy, Shaping the Future," carries profound significance. As we celebrate the 60th anniversary of the KSPRS, we look back with pride on six decades of clinical excellence, academic growth, and surgical innovation. This congress is not only a tribute to our remarkable heritage but also a strategic platform to define the next era of aesthetic and reconstructive plastic surgery.

Building on the success of PRS KOREA 2025, which attracted over 1,400 experts from 45 countries, we have curated an even more comprehensive program for 2026. We are excited to host a global community of innovators and thought leaders who will share cutting-edge research and the latest technological advancements that will shape the future of our field.

PRS KOREA 2026 will provide an invaluable opportunity to honor our shared past while igniting the innovations of tomorrow. We invite you to join us in Seoul to participate in this historic milestone, fostering collaboration and excellence that transcends borders.
