Country	Japan	
Short Bio		
Dr. Masaki Arikawa is a plastic and reconstructive surgeon at the National Cancer Center Hospital in Tokyo, Japan. His clinical and research interests focus on oncologic reconstruction, particularly sarcoma reconstruction and limb salvage surgery. His clinical expertise includes microsurgical soft-tissue and vascular reconstruction, vascularized bone transfer, and reconstruction of complex musculoskeletal defects following tumor resection. As a member of a multidisciplinary sarcoma team, he works closely with orthopedic oncologists to support limb preservation and functional reconstruction following oncologic surgery. His practice also encompasses breast, head and neck, chest wall, pelvic, and perineal reconstruction. His current research focuses on reconstructive strategies for challenging oncologic defects and functional outcomes following limb salvage surgery.
